Theme: How faith and God is shown through your family's daily life.

Our family had many troubles without God's help. When we didn't know the gospel, we were rich and we didn't care about GOD. We only cared about money; however, God changed our lives by making us financially poor. Later on, we realized that God wanted to change our lives by not focusing on money or success. My mom received the correct gospel from the help of her friend. Since my mom heard the accurate gospel, she accepted God and quickly shared it with us. When we heard about the gospel, we accepted Jesus Christ as our master. Ever since we heard about the gospel, God has made our lives, so we would pray and praise him whenever we can. When our family heard about the gospel and enjoyed it, God helped our family from financial hardship. When we had many problems and troubles in our daily lives, we went back to God by praying and asking for wisdom. Also, telling ourselves that God has his own time schedule for us. I also knew that God would be using me to share the gospel to other people. The reason is because I held onto the true covenant from Act 1:8. My mom and I were involved in a car accident 2 days ago and I felt like God protected us from a car accident. We were going home after visiting the pediatrician but sadly my mom crashed into the car in front of our car. Luckily, we were both safe and the other person who was in the car was also safe. Our family praised God and thanked him for saving us from having injuries . When our family was doing worship daily at home during pandemic years, I hated the worship. It would take 30 minutes and it was a long time for me.

However, ever since I met God, he changed my heart to enjoy worship more. Also when we had financial problems, God helped us by sending new customers little by little to my dad's business. Our family is also getting support from my mom and dad's parents. There is an aunt we pray for because she is very stubborn but after she met God personally, her life changed. Also her attitude started to change. Since we have witnessed God's work we started to believe that Jesus is really working in our daily lives. During the pandemic, I wasn't able to focus on zoom class and my grades dropped down. My mom was upset, so she told me to pray to God and my mom had faith in God that he would fix my bad habits. One day, God fixed my habits, and I actually started to focus in class and got good grades. My friend's church has 9PM worship through zoom, so I decided to join at least once. When I joined, I didn't enjoy it very much. One day, I went to their church in person, and my forum leader asked me what my prayer typic is and I told her that my prayer typic is to actually enjoy the 9PM worship. That way I can keep listening to the gospel. My forum leader started to pray for me from that day forward. Suddenly, God has changed my heart to actually enjoy the zoom worship. Another way that God helped me was that when I was young, I used to be very annoying to my older sister. My mom used to be very stressed out about telling me to stop being annoyed with my sister. I told her that I won't, but I never stopped. I continued to annoy my sister until my mom just gave up on me. She said that she had faith in God and he will fix my attitude. I didn't really think that God would ever change my attitude, but after about a week later, I started not to annoy my sister and that really surprised me. This is how I really believed that God is working in my daily life changing every little thing that I did wrong to make it correct. Also, I pray before taking my black

belt testing from Tae Kwon Do. When they tell us to meditate before they start the testing, I pray instead of worldly meditate. It is not in my power that I will succeed but God needs to help me. Since I pray to God everytime there is a belt testing, I succeed when the belt testing is done, I give all glory and thanks to God. I do the same thing for soccer games because I want my soccer team to win. I prayed before the soccer game started, and when the game was over, our team had victory. However, we had lost only once because I did not pray one time before we started the game. Since then I have prayed to God. I am in a dual language program and teachers give us more homework than regular program. Compared to traditional classes, the dual program students get much more homework than the traditional kids in our school. I always sleep late because I do not confess God's words, so I always get distracted when I'm doing my homework. When my mom gets stressed out about me sleeping late, she told me to pray to God and also she would pray for me so that I would focus on my homework. Since we prayed together about focusing on my homework and studies, I have been finishing my work on time and doing my other homework ahead of time. God has answered my prayers so my mom has given our church more offering. My sister has also changed. She would only listen to a lot of k-pop songs. One day my mom sent her to the church retreat and after she came home from the retreat, her attitude changed. Surprisingly, she slowly started listening to gospel songs. This really impressed my mom so my mom told her to continue to go to the church retreats. Also, we started to worship during the pandemic. It really changed my family's life. Before the pandemic, we didn't have time or didn't want to worship God. Due to the pandemic, my dad's job started to run slow, so that time we decided to worship God. We had faith that God would change

our situation. I knew that God knows our situation and he is trying to help us because we are his children. This is why my mom tells me to read the bible daily to enjoy the gospel because that will make the forces of darkness bind in the name of Jesus Christ. This is how faith and God is shown to our family's daily life and until the end.
